TECHNICAL BULLETIN

SUBJECT: 250ML CONSOLE SOFTWARE VERSION 1.3 RELEASE	SERIES: 250ML Consoles
DISTRIBUTION: General Release	STATUS: Routine

Introduction

250ML Console Software Version 1.3

Philips Strand Lighting has released a new version of software for the 250ML console. This software, Version 1.3, is available for immediate download from the Support section of the Philips Strand Lighting web site at www.strandlighting.com.

This version of software not only resolves reported issues but advances the console with exceptional improvements and features.

Note: This bulletin is for information purposes only. Users and owners are not required to inspect or load this version of software in their 250ML consoles unless they wish to have these added improvements and features. Before updating console software, Philips Strand Lighting recommends users make a backup of all current show files.

Software Version 1.3 Release Summary

Below is a description of some of the more important improvements followed by a complete history of changes in “Beta Versions and Content” on page 2 of this bulletin.

Increased Exclusive Submaster's Functionality

The Exclusive sub is now outside of Playback Master and Grand Master control

Increased Functionality of A/B sliders and integration with the GO button.

The A/B faders can now be used in conjunction with the GO button fluidly.

Note: Refer to the 250ML Console Operations Manual for software upgrade installation instructions. A copy of this manual is located on the Philips Strand Lighting web site at www.strandlighting.com.

Beta Versions and Content

This is the complete list of the beta versions and the content of each beta software version.

V1.3

- Correct versioning numbers on color screen and external monitor.

V1.295B

- The Exclusive sub is now outside of Playback Master and Grand Master control. Also should not be able to be grabbed with the encoder wheel.

V1.294B

- Add the function of Hold [shift] + [home]: release all fixture attribute to default value.
- Fix the issue on Group: Select a Group will not change the position / color information.
- Fix the issue on Group: Select a new Group, it will capture the previous Group in existing level.
- Fix the issue on Effect: When record SUB, Effect can override static position & static position can override Effect.
- Fix the issue on display: The Position on monitor show "C:01", but NOT "P:01"
- Add the function: Manual Playback of Cues using A/B sliders with no fade time.
- Fix the issue on running Auto Cue Playback.

V1.291B

- The Position on monitor now correctly shows "P:01".
- Adds the function: Manual Playback of Cues using A/B sliders with no fade time. control by manual slider.

V1.29B

- Adds Hold [Shift] + [Home]: release all fixture attribute to default value.
- Hold [untag] + [fixture]/[Position]/[Color]/[Beam]: release corresponding attribute.
- Hold [untag] + s1----s10 (only in fixture status): release corresponding fixture.
- Hold [fixture]/[Position]/[Color]/[Beam] + [Home]: release and return to default value.
- Hold [home] + [fixture]/[Position]/[Color]/[Beam]: only return to default value.
- Hold [shift] + [home]: release All fixture and all attribute. Return to default value.
- Hold [shift] + s1...s10 (only in fixture status): only release corresponding Fixture attributes.

V1.28B

- When a chase is recorded onto a submaster on a higher page number, it will no longer be reassigned to a different page.

V1.27B

- Fixes a software crash caused by changing the direction of a running fx.

V1.26B

- Submasters (Pile on) with LED colors are working correctly.
- Deleting and moving cues are now work.
- Groups are now be working.
- Color Palettes should now work regardless of encoder page assignment and regardless of recording all or partial.
- The ability to delete a single submaster now works.

V1.25B

- No subs / playbacks / effects / or cues recorded causes the console to lock.

V1.24B

- Addresses and correct a bug in V1.23B whereby a "locked" console cannot be recovered.

V1.23B

- More exit possibilities with the encoders.
- Adding fixtures, you stay on the page you left for choosing your fixture.
- Playback steps stay working when you are in sub or cuelist.
- GO button now works with A/B faders.
- Copying submaster doesn't reset adjustments to color options anymore.
- Cues in preview are more accurate.
- Inhibitive stays working on changing pages.
