Chilli Control Panels

The Chilli Control Panels can be employed where simple scene setting is required. Available in a variety of configurations, the control panels provide direct access to the internal memories and sequences of the dimmer. Panels can be assigned to any one of the 10 areas.

Available in 2, 5 and 10 button configurations, the panels have been designed to fit any standard UK single gang back box allowing simple installation and are available in brushed stainless steel or brushed brass with illuminated buttons. Up to 50 Chilli Control Panels can be used on a single network, providing multi-point control with modern aesthetics.

A Last Man Out panel is also available. This panel features a 5 button control panel and a keyswitch, allowing for a supervisor to turn the network on or off from a single location. When the keyswitch is turned, after a 30 second delay, the panel sends an All Off command to the ChilliNet dimmers. The Last Man Out panel fits a standard UK double gang back box.
