

SD-DRIVE 1

The SD-DRIVE 1 is a single channel dimmer for control of LED light sources. The small compact size is ideal for installation in confined spaces, and the choice of control modes makes the SD-DRIVE 1 suitable for a wide range of installation applications.

Removable terminal sockets allow for easy replacement, and the ten position dipswitch enables simple, fast configuration.

Choose from DMX or Analogue input for maximum control flexibility.

Features:

- Up to 6A output capacity
- Single Channel LED Dimmer
- DMX 512 input or 0-10V analog input
- DMX Start Address configurable
- DMX Control mode or Manual Dim mode
- Silent passive cooling
- 8 or 16 bit DMX-512A operation
- 10 position dipswitch for addressing and setup
- Terminal connectors for input and output
- connections - Requires power supply
