

PRODUCT: All Philips Vari-Lite Luminaires

SUBJECT: Caution Against Direct Sunlight Through Front Lens Assembly

OVERVIEW

Philips Vari-Lite would like to remind all owners and users of any Philips VARI*LITE luminaire not to allow direct sunlight or light from neighboring fixtures directly through the front lens assembly. See "[Precautions](#)" for more information.

If you have any questions as to any aspect of this Technical Notice, please contact Philips Vari-Lite customer service at 1-877-VARILITE or +1-214-647-7880.

Note: This technical notice is for information purposes only. Owners and users are not required to inspect or make any changes to their fixtures.

WARNING: Any repairs or maintenance to Philips VARI*LITE luminaires should only be performed by a trained and qualified service technician or at an Authorized Philips VARI*LITE Service facility.

PRECAUTIONS

The design and nature of the front lens assembly in Philips VARI*LITE luminaires is to efficiently focus the light energy from the luminaire's lamp for maximum light output.

- When the front lens assembly is exposed to direct sunlight or intense light from neighboring fixtures, the lens will collect and intensify this light and focus it back into the fixture. Intense sunlight or beams from other fixtures can cause damage to internal assemblies contained within the fixture.
- When fixture is not in use and direct sunlight or other intense light is present, position luminaires so their front lens assembly is not directly exposed to the light source.

CONTACT INFORMATION

For more information on this technical notice or on Philips VARI*LITE products, please contact your Authorized Philips VARI*LITE Dealer or Philips Vari-Lite customer service at 1.214.647.7880.
