

PRODUCT: VL440 Spot Luminaires

SUBJECT: Use of Metal Gobos - No Longer Permitted

OVERVIEW

Due to the inconsistency of metal alloys used in metal gobos and the concentrated heat through the VL440 Spot Luminaire optics, Vari-Lite must alter its stance on allowing metal gobos in VL440 Spot Luminaires.

While metal gobos are acceptable for use in static stage luminaires, metal gobos have been found incompatible for use in VARI*LITE automated luminaires.

Owners and users of VL440 Spot Luminaires should, if using metal gobos in these fixtures, immediately halt the use of all metal gobos and replace them with glass equivalents.

If you have any questions as to any aspect of this Technical Notice, please contact Vari-Lite customer service at 1-877-VARILITE or +1-214-647-7880.

Note: This technical notice is for information purposes only. Owners and users are not required to inspect or change their gobos unless they are using metal gobos.

Note: VL440 Spot Luminaires accept glass gobos only. Use of metal gobos in these luminaires may damage gobo assembly.

WARNING: Any repairs or maintenance to VARI*LITE luminaires should only be performed by a trained and qualified service technician or at an Authorized VARI*LITE Service facility.
