

VL3600 PROFILE IP

SUBJECT

New software release

OVERVIEW

Updated firmware for the following fixtures

Fixture	Version
VL3600 PROFILE IP	121322

The latest software can be downloaded from the product page or our website www.VARI-LITE.com

RELEASE NOTES

Updates from the previous version 112222

- Locking of UI screen whilst in service menu – when accessing service, the service menu the UI screen lock will no longer activate on a timeout. The UI screen will remain unlocked whilst the user is accessing the service menu.
- Internal sensor update to limit current ghost errors showing on UI
- Optimization of LED array cooling
- Pan & Tilt Disable from UI action updated

Important Note:

- Vari-Lite Recommends as standard practice, when using PEGASUS, to always first perform a SCAN DEVICES prior to sending firmware. This ensures any devices present on the DMX line that are different from the fixture you are sending software will be muted. This prevents any possible interference during the upload process.

Know software issues:

- Edge tracking not activated.
