

SUBJECT: VL4000 Spot Luminaire Software Release	SERIES: 4000
DISTRIBUTION: Service Centers, End Users	STATUS: Routine

Introduction

Embedded Software Release

Vari-Lite has a new software release for VL4000 Spot Luminaires. Software version **01/16/15** (file name, **VL4000_011615.bin**) is now available for download and installation.

Vari-Lite suggests all owners and users of the VL4000 Spot Luminaires download and install this new version of software from the Support section of the Vari-Lite web site (www.vari-lite.com).

Please review this bulletin in its entirety before downloading and installing the software.

Note: VL4000 Spot Luminaires manufactured on and after **01/05/15** will have this software installed. This software may be loaded in all previously manufactured fixtures.

Important Notes About this Version of Software

- * *Please review this bulletin in its entirety before downloading and installing the software.*
- * *After installing this software update, some show programming may require modification. Certain fixture operation will be affected by installing this software.*
- * *Pay close attention to “Set Tilt Cal” on page 5. The procedure described will need to be done or show programming altered after loading this software.*
- * *Power recycling is required after new software is installed.*

About PEGASUS Upload Software

For instructions on downloading and installing VARI*LITE luminaire software, refer to luminaire’s user manual.

The PEGASUS Upload Software and luminaire firmware files are available for download, at no charge, from the Philips Vari-Lite web site at www.vari-lite.com in any luminaire product downloads support section.

For more information on PEGASUS Upload Software, please refer to Vari-Lite Technical Notice TN-349 (located in any product downloads Support section on the Vari-Lite web site) or contact your Authorized VARI*LITE Dealer or Vari-Lite customer service.

If you have any questions regarding this release or your VARI*LITE product, please contact Vari-Lite Customer Service at 1-877-VARILITE (or +1-214-647-7880) or via e-mail at entertainment.service@philips.com.

Release Notes

Updates to VL4000 Spot Luminaire Software (01/16/15):

New Features - General

Implemented Fixture Shutdown - Refer to current user's manual* for DMX values contained in the luminaire's control channel for this feature. This command will turn the lamp OFF, disable all motors, and stop the luminaire from functioning until either a Full Luminaire ReCal command or Lamp ON command is sent. When in the shutdown state, the luminaires menu will display **SHUTDOWN**.

Note: The luminaire's cooling fans will continue to run for 5 minutes after the shutdown command is sent. After 5 minutes the luminaire fans will shutdown. A power cycle will also clear the shutdown state.

Added USB Menu under the Fixture Menu - added some new features including data logging and the ability to load fixture software via the USB port. See the following and refer to "[Appendix B](#)" on [page 10](#) for more information.

- **Implemented USB Logging** - The VL4000 Spot luminaire now stores error messages in a log file within the luminaire. This information along with specific luminaire settings can be saved as a .csv (*comma-separated values*) file to a USB flash drive connected to the USB port.

To save the current log file to a USB Flash Drive:

- Step 1. Insert a USB flash drive (*not supplied, by others*) into luminaire's USB port.
- Step 2. Press [ESC].
- Step 3. Press [UP] / [DOWN] arrows until **Fixture** appears. Press [OK].
- Step 4. Press [UP] / [DOWN] arrows until **USB** appears. Press [OK].
- Step 5. Press [UP] / [DOWN] arrows until **USB Log** appears. Press [OK].
- Step 6. Press [UP] / [DOWN] arrows until **DOWNLOAD** appears. Press [OK].
- Step 7. Once the download is complete, the display will read "**Reset Current Lum error log file?**" Press [OK] to reset or [ESC] to exit.
- Step 8. Press [OK] to clear the current log file in the luminaire or [ESC] to keep it.

The .csv log file on the USB Flash Drive can be read via any computer system. The file name will be as follows: 4KSxxxx.csv (the xxxx will be the unique luminaire ID of the fixture). Each log file contains labels and values as shown in [Table 1 on page 3](#) of this bulletin.

VARI*LITE TECHNICAL BULLETIN

Table 1: .csv Log File Information

Parameter	Example Information	Meaning
Model	VL4000 Spot	The fixture model
Fixture Hours	142	The total of number of hours the fixture has been operating
DMX Address	1	Current DMX address of the fixture as set by the user
RDM UID	56:4c:2f:0:7:2a	Refer to Table 3 on page 7 for information
Luminaire ID	1834	Current luminaire identification number
Software Version	1/6/2015	Current software version loaded in the fixture
DMX Map	16-bit Enh	Current DMX mode setting (<i>16 bit enhanced or 16 bit</i>)
Swap Pan/Tilt	No	Current pan and tilt setting
Invert Pan	No	Current pan operation setting
Invert Tilt	No	Current tilt operation setting
Lamp Power Up	Lamp Off	Current Lamp Power Up option setting (<i>Lamp Off, Lamp ON, or Cal On</i>)
Lamp Level	Standard	Current operating mode of the fixture (<i>Standard or Studio</i>)
Lamp Strikes	518	Total number of lamp strikes initiated by the fixture
Lamp Hours	140	Total number of lamp hours since the last lamp hour reset
Fixture Hour	Error Type(s)	Lists any errors and their associated fixtures hour (<i>in example shown, a pan error occurred at fixture hour 138</i>)
138	Pan no sensor	

- **Implemented USB Upload** - The VL4000 Spot luminaire can have its firmware updated via the USB port.

To upload luminaire software to a luminaire using a USB Flash drive.

- Step 1. On a computer connected to the Internet, download the luminaire software from the Vari-Lite web site. Refer to current user's manual* for more information on downloading Luminaire software. **Save the downloaded .bin file to the root directory on a USB flash drive (not supplied, by others). Do not store the .bin file in any folder on the USB flash drive.**
- Step 2. Insert USB flash drive into luminaire's USB port.
- Step 3. Press [ESC].
- Step 4. Press [UP] / [DOWN] arrows until **Fixture** appears. Press [OK].
- Step 5. Press [UP] / [DOWN] arrows until **USB** appears. Press [OK].
- Step 6. Press [UP] / [DOWN] arrows until **USB Upload** appears. Press [OK].
- Step 7. The display will show download progress.

To verify software version at luminaire:

- Step 1. At Menu Display, press [ESC].
- Step 2. Press [UP] / [DOWN] arrows until **Fixture** appears. Press [OK].
- Step 3. Press [UP] / [DOWN] arrows until **Version** appears. Press [OK].
- 1) The first half of the version will be displayed as a date (**MM/DD/YY**). For example, **03/18/14** (March 18, 2014).
 - 2) Press [Enter] to display second half of version. This will be displayed as a time (HH:MM). (For example, **16.36** = 4:36 pm).

- **Implemented RDM** - RDM functionality for the VL4000 Spot has been implemented. Refer to ["Appendix A" on page 7](#) of this bulletin for tables outlining the luminaire's specific RDM capabilities.

Added Auto-Recal to Configure ->Head Motors ->Enable - when the head motors are re-enabled, the luminaire will now ReCal the head motors before enabling.

Improved Test Routines - The test routines accessed via the luminaire's menu system have been improved from the previous software version.

Improved Gobo Time - When using gobo time, the scaling of time values has been optimized throughout the entire timing range to allow better gobo time usage.

New Items in Service Menu

CAUTION: Certain features described below are for Authorized Service Centers and Certified Vari-Lite Technicians use only. Refer to [“Appendix B” on page 10](#) for more information.

Set Tilt Cal

Added a Set Tilt Calibration (Set Tilt Cal) menu under the Fixture -> Service menu. This version of firmware improves the centering calibration of the tilt parameter. When the firmware is installed, the tilt values may differ from previous values. Show data can be updated to correct for the update, however for the best performance user are advised to calibrate the tilt using the luminaire's LCD menu.

To Set Tilt Cal:

- Step 1. Press [UP] / [DOWN] arrows until **Service** appears. Press [OK].
- Step 2. Press [UP] / [DOWN] arrows until **Set Tilt Cal** appears. Press [OK].
- Step 3. The display will read **Set Tilt Encoder Center Tilt Position Press OK** and the tilt motors will disengage.
- Step 4. Manually move by hand the tilt of the luminaire's head until it is in alignment with the yoke arm as shown in [Figure 1](#).

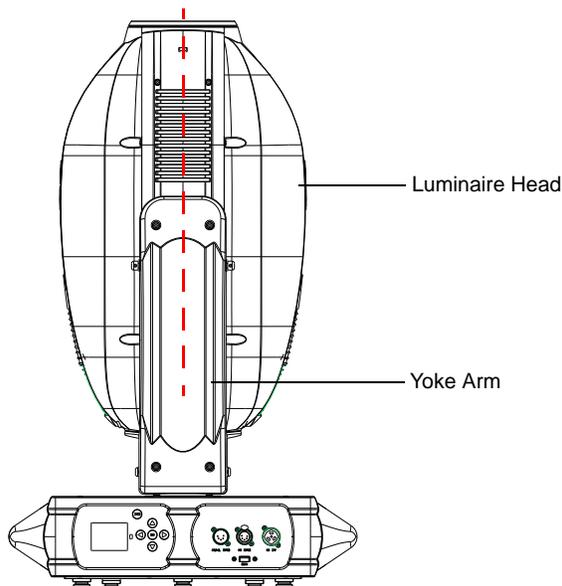

Figure 1: VL4000 Spot Luminaire

- Step 5. Press [OK] to accept the calibration or [ESC] to cancel the calibration.

Gobo Offset

Added Gobo Offset (for each Gobo Wheel) menu under the Fixture -> Service menu - This version of firmware introduces the ability to adjust the offset of each gobo wheel and should only be adjusted if a wheel is not properly centering gobos in the aperture.

CAUTION: This feature should only be performed by Authorized Service Centers and Certified Vari-Lite Technicians.

To Set Gobo Offset for gobo wheel 1 and/or gobo wheel 2:

- Step 1. Using a DMX console or manual control, select a gobo on the desired wheel and adjust the edge parameter accordingly.
- Step 2. Press [UP] / [DOWN] arrows until **Service** appears. Press [OK].
- Step 3. Press [UP] / [DOWN] arrows until **Gobo 1 Offset** or **Gobo 2 Offset** appears. Press [OK].
- Step 4. The display will read **65535**. Use the [UP] / [DOWN] arrows to move selected gobo wheel within the aperture as desired.
- Step 5. Press [OK] to accept and store the gobo offset setting or [ESC] to cancel the gobo offset setting.

Contact Information

For more information on this technical bulletin or on VARI*LITE products, please contact your Authorized VARI*LITE Dealer or Vari-Lite customer service.

Appendix A

VL4000 Spot Luminaire RDM Parameter IDs

The following tables outline and describe all the RDM parameters IDs associated with VL4000 Spot Luminaires.

- [Table 2, "VL4000 Spot Luminaire RDM Product Parameters IDs"](#)
- [Table 3, "VL4000 Spot Luminaire RDM UID"](#)
- [Table 4, "VL4000 Spot Luminaire RDM Parameters IDs"](#)

Appendix B

VL4000 Spot Luminaire Revised Menu Structure

Old Fixture Structure

(for software versions PRIOR to 01/16/15)

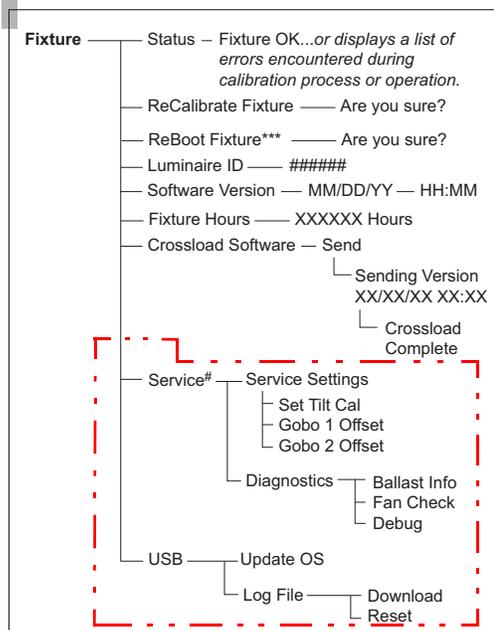

Notes:

***Reboots entire fixture including processor.
For use by authorized service technicians only.

NEW Fixture Menu Structure

(for software versions 01/16/15 and later)

Notes:

***Reboots entire fixture including processor.
For use by authorized service technicians only.

Note: Revised menu items highlighted in red outline.
