

VARI*LITE

STADIUMS AND ARENAS

Application Guide

Stadium & Arena Features

- 
- Large venues with lots of ambient light
 - Multiple, connected spaces surrounding central area of play
 - Production, architainment, and studio lighting
 - Atmosphere of excitement and fun
 - Multiuse spaces for concerts and other events
 - Outdoor, indoor, or both

Stadium & Arena Spaces

- 
- **Venue-wide Control** – manage the lighting for the entire venue from anywhere with distributed control of timed events, emergency response, and maintenance.
 - **Studio Spaces** – commentators need a space to discuss the game on camera. Stadiums and arenas need excellent light quality in these spaces for natural skin tones.
 - **Playing Field** – the place where the magic happens, whether it's a pitch, field, or court. Amp up the excitement for games and performances alike with high powered entertainment lighting that ensures the fun goes on no matter the weather.
 - **Lobbies** – where guests get their first impression. Get energetic looks in these public spaces with moods that shift automatically.
 - **Bars, Restaurants, and Retail** – whether guests are looking for a bite to eat, the perfect souvenir, or just a break before, after, or even during the game, dining and retail spaces can be dynamic and engaging, fitting any mood.
 - **Patios and Outdoor Spaces** – these outdoor entertainment spaces are great places for guests to gather before the doors open for a game or concert. Get weather-resistant lighting to amp the mood and host small music acts.

Challenge

Solution

When it's game time, there is nothing like the feeling of an amped up crowd cheering for their favorite team. Lighting in a stadium or arena should enhance the mood.

With wide color spectrums and a broad range of onboard effects, entertainment lighting from Vari-Lite offers the tools to create dynamic, engaging sports entertainment experiences fans will remember.

Between high ceilings and a preponderance of lights and LED signage in a modern stadium or arena, making an impact can be difficult. Entertainment lighting needs a way to cut through the ambient light over long throw distances.

The top-quality optical systems on luminaires like the VL3600 Series, VL10 Series, and VL2600 SE Series ensure your entertainment lighting offers the high output and quality of light modern stadiums and arenas need.

Branding is a major part of the design for any modern stadium or arena. Whether it's the logo of the team or paid sponsors, these venues need to project onto the playing area without permanently altering the look.

The customizable glass gobos and high output of the VL3600 Series and VL10 Series allow facilities to easily project crisp logos onto the field, offering a branding and revenue-generating opportunity.

For stadiums, the field is open to the weather, and even arenas may have some entertainment spaces, such as outdoor patios, that are exposed to the elements. Lighting for these spaces should deliver high energy looks without being impacted by water sprays or dust.

Vari-Lite offers several powerful IP rated luminaires, perfect to increase excitement in any outdoor space, from moving heads like the VL3600 Series to fixed luminaires like the IP Image Projecting Profile Series and Punchlite Series.

Challenge

There is generally no motorized rigging in stadiums and arenas, and with ongoing schedules, there is often little-to-no opportunity for extended maintenance during the season. Entertainment lighting solutions, therefore, need to be reliable and designed for easy repair.

Solution

Vari-Lite has been one of the most trusted names in entertainment lighting for over 40 years. Our products and solutions maximize reusability, serviceability, and upgradeability, for a more reliable, longer-lasting product.

CONNECTIVITY

Neo X Series Consoles - high-performance lighting console designed for professional productions, with 5 and 15 fader options.

FLX S Series Consoles - intuitive lighting console to create beautiful looks in less time, with 24 and 48 channel options.

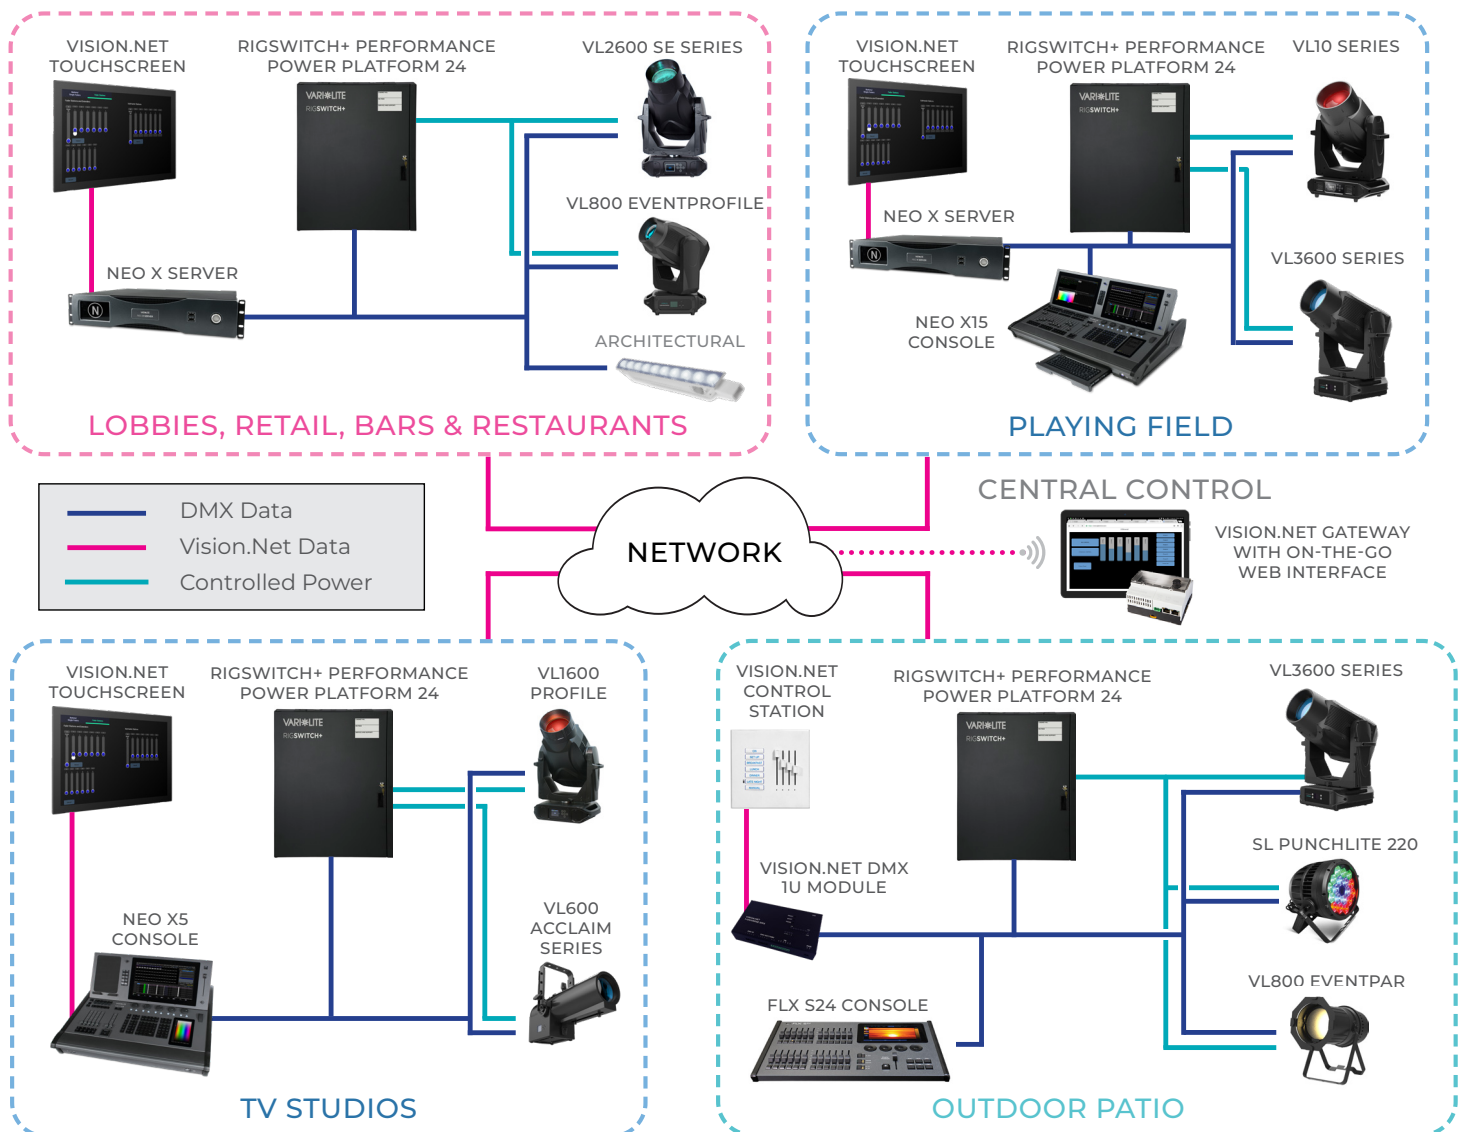

Neo X Server – the power of a Neo X console in a rackmount format for archtainment applications.
